# *Your Computer Made Easy*

This month, a dose of practicality. Many of us are long time computer users, which means many of us have been around a long time, period. As we get more "experienced", certain shortcomings of computer interfaces become more pronounced.

Fortunately, modern operating systems come with many facilities to aid us in their use. From simple things like enlarging text to fancier ones like having your computer read the screen to you, Windows comes with many accessibility features that can aid your computer use.

Don't think of "accessibility" as infirmity. There are many practical reasons you can find to use accessibility features. Are you fond of the small netbook and ultrabook computers, but not so fond of that small screen? Accessibility features can make the difference between a useable and difficult-to-use computer.

We'll tour the Windows features first, demonstrating the many obvious and some not so obvious features available to help make Windows easier to use.

Diane George is planning a brief presentation on the LDS project, a volunteer project for indexing old census and other public records, such as draft records, for the genealogy site familysearch. org. This effort digitizes information that was previously unavailable in electronic form and makes it available for anyone interested in genealogy.

As always, there will be good food, good fun, and good friends all around. See you there!

Raffle! This month, a Lexar LJDTT32GASBNA JumpDrive TwistTurn Flash Drive - 32GB, USB 2.0. It has a simple plug-and-play design that allows you to quickly and easily store files, so wherever you go, your information goes with you. Its durable hinged jacket rotates to easily access a USB port, and it sports an LED activity light that blinks during file transfer, so you know when the job is done. JumpDrive TwistTurn also works across platforms, giving you flexibility and ease of use. AND, it's YOURS for the price of a ticket.

Tickets are **$5** each, available where you sign in. Need not be present to win.

Clubhouse Information

Please check page 3 for information regarding the Clubhouse. Communitcation with the Clubhouse should be directed to PC Community, P.O. Box 55513, Hayward, CA 94545-0512.

About
PC Community

PC Community is a computer users group for people who wish to expand their knowledge and experience of personal computers and software. This is accomplished through monthly general meetings of the full membership where major industry vendors present information, and through smaller focus groups (Special Interest Groups, or SIGs) where members meet to share common computer interests. The group's monthly Main Meeting takes place at Calvary Baptist Church, 28924 Ruus Road, Hayward, at 7:30 P.M. on the first Friday of each month.

PC Community is dedicated to community service, providing enabling technology to people with special needs, working in the community to obtain computer equipment, and working with other computer groups to help people extend their lives through computer technology.

PC Community has a Web site at **http://www.pcc.org**.

Membership dues are $35.00 per year. $20.00 for educational and seniors (65 and over), and $45.00 for family per year. Call 510-213-8421 for more information, or write to PC Community at the address on this page.

PCC is a member of the Association of Personal Computer User Groups (APCUG)

PCC Announcements
O'Reilly - Books and Media

Review a Book: Review an O'Reilly book and get published in the PCC Newsletter and on the PCC Web Site. Find a book that interests you at www.oreilly.com, e-mail me the name of the book and ISBN so I can order it for you. PCC requires a deposit from you in the amount of the User Group price, a 35% discount. You have 60 days to complete the review, at which time the deposit is refunded and you keep the book.

Elsie Smith - PCC UG Representative to O'Reilly

lcms@pacbell.net or 510-545-2077

PCC Recycle Program is Back, Bigger and Better!

Your used **toner cartridges,** old **cell phones**, used **inkjet cartridges**, old **PDAs** and defunct **iPods** are valuable. Don't toss them in your trash to be used as landfill. They are worth something to PCC and other groups, either in the form of exchange or as discount on products at some local retailers. This not only helps PCC, but also helps our community. You can drop any of these items off at a Main Meeting or an EC Meeting. Do your part for PCC and your community! Keep the environment clean by taking a few extra moments to recycle these items with PCC.

contact:
Chuck Horner
churck@comcast.net
**510-589-9677**

Directions to the PCC Main Meeting

From All Directions: take 880 to the Tennyson Road exit in Hayward. Take the exit toward the hills. Proceed northeast on Tennyson Rd. about 0.7 mile to the 5th stoplight. This will be Ruus Road.

Turn right on Ruus Road and proceed southeast for about 0.4 mile. Look for Calvary Baptist Church on your left.

Turn left into the driveway into the parking lot. Parking is available anywhere from the driveway to the back of the lot.

Look for the PCC signs.

PCC Clubhouse Seeking House!

PCC's Clubhouse is temporarily without a -- house. With extraordinary effort, Clubhouse VP **Sid Jordan** and clubhouse regulars **Tony Cozzette, Don Feist, Bruce Hevelin, Charles Landsmerer, Bob McGeary, Del Parton, Ted Rosaro, AC Robinson, and Michael Wong** cleared out years of accumulation and took it to the recycle center for cash. Their efforts added $800 to PCC's finances.

That's the good news. The bad news is that the Clubhouse is temporarily homeless. We are working on a temporary location from which the refurbishing activities can continue, but we are still seeking a larger facility from which the Clubhouse's full set of activities can continue. We are setting up a contact phone number where you can call and find out about Clubhouse progress.

If you know of a facility that can house our Clubhouse, (think of the old Clubhouse for size) contact anyone on the Executive Committee and let them know. Contact information for the E.C. is on page 2 of this Newsletter, or go to www.pcc.org and click on Contact Us.

President's Podium

Chuck Horner

churck@comcast.net

Members and Friends,

There are several things you all need to know this month:

1. DIGITAL PHOTO CONTEST

Our members have been so successful at this contest over the years. Since the deadline is MAY 11, you must submit your photo entries at our May 4th Main Meeting, before it begins. At our May meeting we will vote for the best in each category for submission to the Southwest Computer Conference. Please carefully follow the instructions in the link below:

http://www.theswcc.org/contests/contests.htm

Diane George graciously agreed again to coordinator your submissions for the Southwest Computer Conference. DIGEORGE380@HOTMAIL.COM

Categories include

» People

» Nature & Landscape

» Animals

» Digital Art

4 copies and a JPEG digital version must be submitted early to Diane for her to submit in time.

2. SOUTHWEST TECHNOLOGY & COMPUTER CONFERENCE:

Enhance Your Life with Technology, 19th Annual Conference:

June 22, 23 & 24, 2012

Register EARLY before May 21 for only $75, after that the price is $100 at www.theswcc.org/registration/registration.htm at the TOWN & COUNTRY RESORT & CONFERENCE CENTER in beautiful San Diego. www.towncountry.com/index.cfm

Special Hotel Conference rate ends May 26, 2012. So, REGISTER ASAP!

3. VOLUNTEERS ARE NEEDED

to index 1940 census records for genealogical research by September. Basically, you are reading old records and typing them for people to research their family history. The reward is greater access to the records. Diane George might answer your questions after you see the opportunity on their Web site at www.FamilySearch.org

4. MEMBER - PAT O'SULLIVAN

Can you offer transportation to our first Friday Main Meetings to our member Patrick? It stirs my heart that he needs our help and still wants to serve. He sent us the following letter:

"I can no longer attend our meetings as I am in a resident home in Oakland - 3431 Foothill Blvd.#266, Oakland CA 94501-2931. I am without transportation, but I will continue my support to our organization! We do things right and enlighten people. Send me the bill for continued membership. - P. O'Sullivan"

5. PC CLUBHOUSE

We are in desperate need of a place to refurbish computers, so we can support citizens in our community that cannot afford them. This is the reason many of us joined the PCC - to serve our community. Ask your friends and others if they know of any space someone would donate to support our community service. Contact Sid Jordan for details - Sjordan321@aol.com

See ya 7:30 p.m. Friday, May 4, for our Main Meeting.

Oh, and bring your friends, to learn computing with us.

Your servant,
Chuck Horner, churck@comcast.net - 510-589-9677

PestControl

REMOVE STUBBORN BUGS

If a virus slips past your computer's defenses, it's time to roll up your sleeves and go after the bug yourself. Each month, we tell you how to remove some of the most disruptive malware on the Internet.
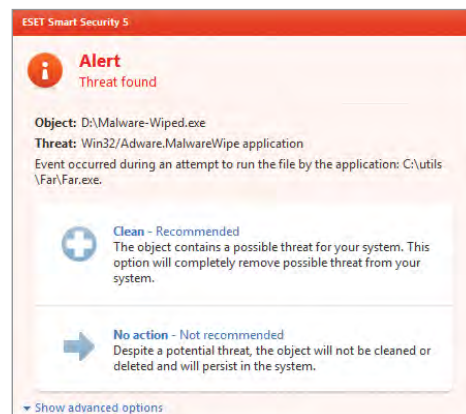

MALWAREWIPE/ PESTTRAP

DESCRIPTION: Few malicious software infections are more annoying than adware and spyware. MalwareWipe and PestTrap are classic examples, as they pepper you with urgent instructions to pay money to remove alleged virus and spyware infections. These "infections" are actually files that have been falsely flagged as malicious by MalwareWipe and PestTrap. To better drive home these phony sales pitches, both programs have the ability to pester you with false warnings about the malware infections on your machine, sometimes using an "always on top" alert window that you can't minimize. MalwareWipe and PestTrap are also capable of sneaky background activity, such as monitoring your Internet access, hijacking your Web browser, and changing system files—all without your knowledge or permission.

How To Remove MalwareWipe/PestTrap

You'll need to use an Internet security suite that offers virus and spyware protection, such as ESET's Smart Security 5 (price starts at $59.99 per year for one PC; www.eset.com). If you suspect your system has been infected by either of these programs, simply run a scan with ESET Smart Security, which will identify the threat and automatically remove the malicious software from your system.

To launch an antivirus scan with ESET Smart Security 5, go to the ESET Smart Security control panel and select Computer scan. You can select either Smart scan or Custom scan. If you need to run a scan immediately and don't have an antivirus program installed, you can use ESET's Free Online Virus Scan (www.eset.com/online-scanner) that works through your Web browser. Companies experiencing persistent and widespread infection by MalwareWipe, PestTrap, or any other malware may want to consider ESET's Malware Removal service (www.eset.com/us/business/services). ▌

ESET Smart Security provides you with antivirus, antispyware, antispam, and firewall protection.

ESET Smart Security 5 can be configured to notify you when threats are found during a scan, and with MalwareWipe, you'd see a window such as this one.
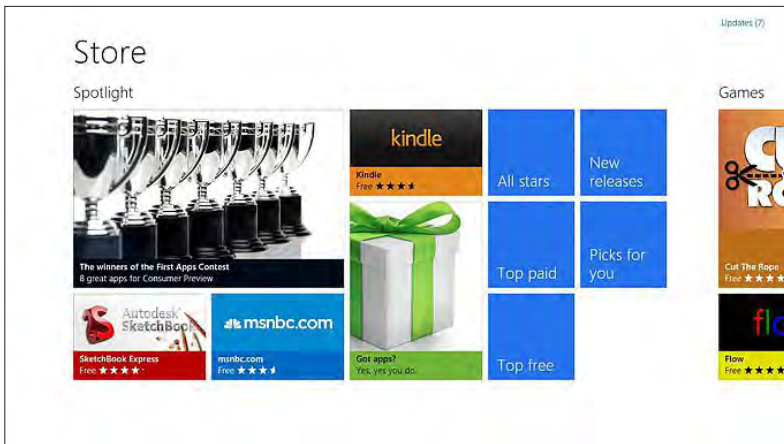

Windows 8 Pains 'n' Gains
What Did They Do To My [Your App Here]?

by Jan Fagerholm, Metro Masochist

News Flash – Microsoft called a big press conference and announced that they are on track for the previously announced 4Q 2012 release of Windows 8. I don't know why they think this is "news" except for the fact that Microsoft rarely makes a scheduled delivery date. While Consumer Preview on x86/x64 is surprisingly polished

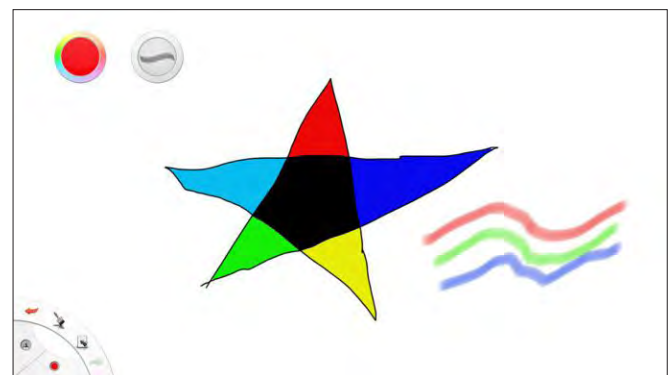

The new Microsoft Store

for a beta, Rumor Central has it that the ARM processor version is still pretty convoluted. This is to be expected, as Microsoft has very little experience programming on that platform, but one wonders if the ARM version will get relegated to the TBA (To Be Announced) category at the time that the Intel/AMD version is released. That would be too bad, as inclusion of the ARM platform was originally a major part of the plan for Windows 8.

Windows 8 Consumer Preview has been with us a few weeks now, and provides us with a fairly accurate view of what the final release will look like.

Living with Windows 8 Consumer Preview on a laptop computer has brought to light some of the changes that Microsoft has in mind for "regular" Windows. In no particular order, here goes:

Interface changes: On the conventional desktop, the Ribbon toolbar has come to rule. You may or may not have had exposure to the Ribbon, but I will take the opportunity to overexplain it a bit here. Previously, we have seen the Ribbon in MS Office 2007 and 2010: in Windows Vista and 7, it only crept into a few Windows accessories. In Windows 8 it is nearly everywhere. Love it or hate it, Microsoft has decided that it is the future for desktop Windows. This is not as onerous as it sounds, though, as along the way Microsoft has listened to The Rest Of Us and

given us the ability to hide it if you don't want the screen clutter. It remembers the state you left it in and starts that way subsequently. It is always available through the tiny carat at the right end of the Menu bar. The Menu bar itself has become a Tab bar with the menu headings being the titles of the tabs. Click the tab and the Ribbon appears displaying the functions for that tab.

Metro: Windows 8 Consumer Preview comes populated with several Metro Tiles. Many Windows Accessories, such as Windows Explorer and Internet Explorer, simply have Tiles (Shortcuts) that launch the expected desktop application. Some have dual personalities: launch Control Panel from the Start menu in the desktop and you get the familiar Windows 7 Control Panel interface. From Metro, invoke the Start menu the same way and you get different choices, among them More PC Settings. Start this, and you get a Metro-ized and simplified selection of Control Panel items which perform the same functions that they do in desktop Control Panel. A notable addition is the ability to personalize the login screen, a welcome addition which I presently enjoy in Linux. (Now, if OS-X would only get on the bandwagon. . .) At some juncture, I would hope that Metro will receive the same personalization features, but so far we are stuck with the retro Windows 95 teal-colored background.

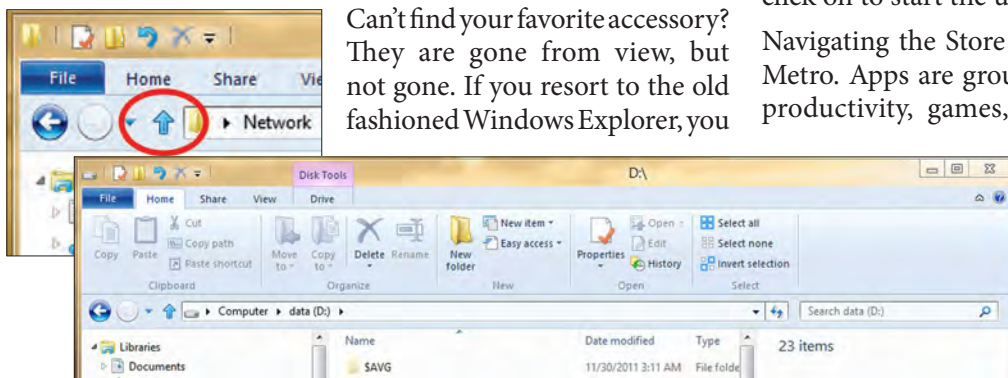

Autodesk Sketchbook Express - drawing simplified

A distinguishing feature of Metro apps is that they run full screen only. This is doubtless a nod toward tablet hardware which has both smaller screens and more modest graphics hardware. Running full screen only eliminates the need for a window manager (the piece of software that draws the window on the screen and formats the application's contents to fit). Lacking a window manager and a taskbar

leads to the thumbnail-style method of switching between apps that Metro employs.

Many of the Windows accessories have been Metro-ized. Windows Media Player has been split into two Metro apps; Video and Music. Outlook Express is now the Mail apps. Windows Messenger is replaced by Messaging. Remote Desktop is – Remote Desktop: It is easier to connect with than the old version. The main difference is that these accessories get the Metro facelift. Functionally, they are much the same.

Can't find your favorite accessory? They are gone from view, but not gone. If you resort to the old fashioned Windows Explorer, you

Windows Explorer Ribbon treatment. Note the Up button

will find most of them in the same places they have always been. (Most of them are in \Windows\System32.)

Speaking of Windows Explorer, it has two big changes: the aforementioned Ribbon interface, and what you could call, "Return Of The Up Button". While Vista removed the "up one directory" button from the toolbar, Windows 8 brings it back, distancing Explorer from its previous "works like the Mac" navigation.

New Metro apps include Reader, which displays most ebook formats and PDF as well. (Exception here is .mobi format.) There is also a Camera app and a companion Photos app to manage photographs.

Living with Metro for awhile, I find that navigating Metro's Start is even easier that Android or iPad. It is

New Copy dialog

one continuous desktop that scrolls horizontally by a variety of methods, making navigation easy. This differs from Android or iPad, which group things into multiple desktops, and you scroll from desktop to desktop. There is also an All Apps view available that thumbnails the Tiles and organizes them by function. Finally, there is a small button on the lower right corner of the screen that zooms out and lets you see the entire Start desktop at once. All of this is navigable by either touch, mouse, or keyboard.

Apps Store – One of the areas where Microsoft is playing catch-up is in launching an online apps store. Of course,
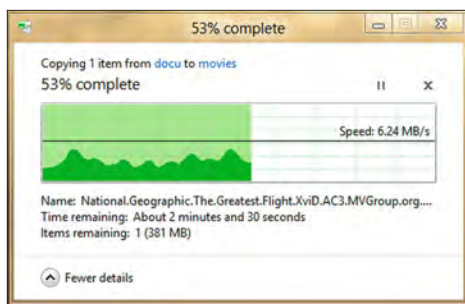

there is a Tile in Metro to go there – it is simply called "Store". Not surprisingly, the Store screen looks a lot like the Metro Start screen when you get there. There is very little indication that you are on line when you enter the store. This is as intended, as one of the things that Metro does is blur the distinction between your local device and an online location. The Store Tile updates itself, like other Tiles, and notifies you of available updates to your installed apps. Enter the Store, and there is a notification area in the upper right corner of the screen that you can click on to start the update process.

Navigating the Store is virtually identical to navigating Metro. Apps are grouped in a logical fashion; free, pay, productivity, games, etc. There is no precise way to determine the number of apps available, but browsing the Store appears to put it in the dozens, rather than the thousands available for Android and iOS. This will certainly change with time, as Microsoft is presently paying outside developers to create apps for Store. One standout is Autodesk's SketchBook Express, a vector drawing program brought over from iOS. On the anti-productivity side, try Pew Pew, an Astroids-like game done graphically like a pencil sketch.

Nits: No instruction manual or Hints in Metro. Poke it and see what happens is the norm for these tablet style interfaces, but there are many features that don't present themselves by poking, like how do you create a Tile (shortcut) in Metro Start for a pre-existing application? (answer: navigate to the program's executable in Windows Explorer, right click on it, and click "Pin to Start" from the menu.)

Picks: Copy operations (and others) that display a progress window have a link or button that offers to display more information on the progress of the operation. I'm a geek, so I always want to see more information. Previous versions of Windows always default to the simple view and you always have to click to see more information. Windows 8 remembers the view you used last and starts with that view. (Why did it take this long for Microsoft to allow the user to make this choice?)

Now that we can see and use Metro apps, it is clearer how Microsoft is modernizing Windows toward the current trend in personal devices for connectivity, social networking, and cloud presence. More about this later.

In Memory of
Christopher Marston

Christopher Marston, a long-time member of PC Community, passed away suddenly on Saturday, April 21st, 2012.

The Funeral Mass will be at 10:00 a.m. on May 3rd, 2012 at St. Johns Catholic Church, 264 E. Lewelling Blvd., San Lorenzo, CA 94580. We know it would honor him to have his PCC friends attend.

We at PCC would like to extend our sympathies to his wife Dolly, his daughter Colette and son Andre, and to let them know he will be missed.

Raffle Prize

Congratulations to the winner of the raffle prize at the Main Meeting!

LiteOn 24X internal DVD/CD Writer..Joy Somerville

Door Prize Donations

O'Reilly Media generously donates the books for our door prizes. Go to www.oreilly.com and pick books you'd like to see on our door prize table. E-mail the names and ISBN of the books you want me to request.

pcc@ix.netcom.com

Treasurer — Tom Smith
smith-tf@pacbell.net

Main Meeting Highlights

April 6, 2012

The meeting was called to order at 7:34 p.m. by Executive Vice President Sally Holt. There won't be any door prizes tonight. The raffle prize is a LiteON 24X Internal DVD/CD Writer. Remember to get your raffle tickets from Harold Smith at the Ticket Table. He also has 3" x 5" cards to write questions for discussion/answers at the end of the Meeting. New and renewing members see Jan.

The Clubhouse is still looking for a home. We are also looking for folks to help out with programs and publicity. The new Microsoft licensing scheme for refurbished computers has been worked out. If you know a low-income or disabled person who could benefit from the donation of such a computer, contact the Clubhouse Manager, Sid Jordan. His e-mail address is in the Newsletter.

SIG Announcements:

The Windows 7 SIG will meet at Bud Gallagher's at 1 p.m. on April 14th, the customary second Saturday after the Main Meeting. The topic is still under development. The May meeting is cancelled.

The Spectacular Linux SIG meets at 2 p.m. on the last Saturday of the month, April 28. The topic is still undecided. There are a lot of new things in the works so there may be late-breaking developments and Jan is open to suggestions and requests.

The Hardware SIG is cancelled this month.

Presentation:

Jan Fagerholm demonstrated XBMC, a Linux distribution media center based on Ubuntu. In the past decade, the price for the equipment to set up a home multi-media center has dropped by about 90% and it has gotten much simpler also, thanks in part to improved wireless technology. Digital displays can scan at a true 60 frames per second, rather than the 30 frames per second of interlaced CRT's. The group enjoyed a fine evening of music and film demonstrating the audio and video qualities and organization capabilities of XBMC.

One can download the XBMC software. It's Linux. It's free. It's strongly suggested that you store your multi-media on a dedicated box. Search for "media center PC" to identify shopping options and select among the many vendors.

Questions:

To solve problems with ads taking up time and space on AT&T by Yahoo Web mail add the Adblock extension to Firefox. There is an Internet Explorer version.

What's the best resolution for HDMI connection between a computer and TV? Use the default.

Why can't I copy graphics from some e-mails in forwarding? Copying capability depends on the graphic. Some images are graphics within the document and some are a link to a Web site. You can always download an image and save to the desktop.

How important is a recovery disk? It matters only if you want to see Windows again after a crash. Some computers have a built-in option to create a recovery disk. Don Odle reported that Easeus creates a recovery software option, at www.easeus.com. It is offered at our favorite price: free.

Has anyone had trouble using Quicken to download Wells Fargo banking information? Web sites don't like older versions of Quicken. It may be that Cookies are not being saved so that access information must be re-entered each time.

Someone sent me a .mov file: How do I view it? Download Quicktime from the Apple Web site. Uncheck the iTunes download that's included with the download. (Or install Linux, which will play all formats.)

The next meeting will be May 4.

The meeting was adjourned at 9:50 p.m.

Respectfully submitted,

Bayle Emlein, Secretary

Executive Committee Meeting Highlights

April 21, 2012

The meeting was called to order at 2:07 p.m. by President Chuck Horner.

Members present: Bayle Emlein, Jan Fagerholm, Sally Holt, Chuck Horner, Diane George, Elsie Smith, Tom Smith. Absent: Sid Jordan.

The minutes of the March 2012 meeting were approved.

Old Business: Diane is finalizing the updated membership form as an interactive PDF. She has fixed the tab-through sequence. The form can be submitted manually or printed and mailed (with payment).

The Southwest Computer Conference will take place in San Diego June 22-24. The photo contest deadline is May 11. Members can bring photos to the May 4 main meeting for members to select the PCC entries in the Southwest Digital Photo Contest. Please bring a printed copy of your entry. Electronic copies could be displayed for members enjoyment but this is purely optional.

Members should bring a print-out of their photo to the May 4 Main Meeting. For more information contact Diane George at digeorge38@hotmail.com.

More information:

http://www.theswcc.org/registration/registration.htm

Digital Photo Contest Deadline: 5/11/12

Early Bird Registration Ends 5/21/12

Hotel Conference Rate through 5/26/12.

President's Report - Chuck Horner: Chuck will have shoulder surgery on June 14. He plans to be around, but semi-operational for a few months.

Executive Vice President – Sally Holt: Sally saw a 4 pound Samsung laptop at the Microsoft store for $900.

Treasurer - Tom Smith: As of April 21, 2012:

Checking Account	$2,497.55
Total	$2,497.55

Tom received a card from Pat O'Sullivan who reports that he is no longer driving. The members of the EC wonder if anyone who lives in Oakland could pick him up, in central Oakland, and bring him to the Main Meeting.

Secretary - Bayle Emlein: The Microsoft RRP Windows license problem has been worked out and the Clubhouse has resumed refurbishing and placing computers in the community.

VP Clubhouse - Sid Jordan: Sid reports that they are in negotiations with Alameda County for a space.

VP Marketing – Position open:

VP Membership - Jan Fagerholm: Member count as of April 21, 2012.

Type	Number	Percent
Regular	28	50.00
Senior	24	42.86
Student	2	3.57
Associate	2	3.57
Totals	56	100.00

Jan is planning to transition the membership database to Excel.

VP Newsletter - Elsie Smith: Submission deadline:

April 21, Saturday midnight, March Newsletter

May 19, Saturday midnight, June Newsletter

VP Special Projects - Bayle Emlein: See Secretary's report.

Webmaster - Diane George: Diane is planning to move the Web site to a new version of Joomla and make some adjustments to the look of the site and is working to keep the site accessible according to ADA standards. She would like recent photos to update the pictures on the Web site. If anyone has any to share, please send them to her. She will need to have the site down for a few hours during the transition. Diane and Jan will coordinate strategies for updating information on the Web site.

Jan will check with Sid about updated Clubhouse information for the Web site and Newsletter.

Calendar: See the Web site for the latest updates and changes in SIG meetings.

The Mobile SIG is meeting, as is the Linux SIG.

Programs -

May: Diane will talk about the LDS volunteer project for indexing old census and other public records, such as draft records, for the genealogy site familysearch.org.

Fund Raiser:

May: 32 GB Lexar USB 2.0 Flash Drive.

New Business: None.

Date and Time of Next Meeting: Saturday, May 19, 2012 at 2:00 p.m., 28924 Ruus Road, Hayward.

The meeting was adjourned at 3:10 p.m.

Respectfully submitted,

Bayle Emlein, Secretary
